Saturday afternoon the new chemical engine, hose wagon and hook and ladder truck for the Island was inspected and approved by the council fire committee. It put out a huge bonfire in a second or two. The whole apparatus weighs only 3,850 pounds, and loaded with hose will not exceed 4,500. The new Seagrave truss ladders for the hook and ladder wagon arrived from Detroit Saturday, but unfortunately they do not fit the truck. The company claims that this difficulty can be easily obviated.

Thursday's Conference.

The Association of Glass Manufacturers and the Glass Workers' Union committee meet on the 21st at Pitts-burgh to discuss the scale question. The manufacturers are determined not to recede from what they consider the reasonable demands they have made from the men.—As has been explained in the INTELLIGENCES the questions at issue do not touch upon wages. The manufac-turers ask that the limit to the number of pieces that may be made in a turn be removed and the arbitrary summer stop abandoned.

Last week the dispute between the Ohio-side electrical railway company and the Wheeling bridge company was amicably adjusted, and the former company secured the right to lay its tracks across the west approach to the Ætnaville bridge. On Saturday the connection with the Wheeling Railway Company's tracks was made there, and yesterday for the first time cars were run through from Martin's Ferry to Bellaire and return. Ten cents is the fare each way. The line was largely patronized. Through Cars on the Ohlo Side.
